2. Forecasts for FY202503

FY202503 Forecasts

Sales are expected to be at the same level, but each profits to decrease for the moment. For there are expectedly few completions of large projects within the FY in Steel Structure segment, which earns 30-40% of the total profit, and attaining contract alterations would be in the next FY onwards.

FY202503 Forecast (1) Steel Construction Segment

Steel Bridge : The new-construction shows declining trend in the medium-to-long term, but the market for renewal and maintenance work is firm for a while.

Building Structure : The market for super high-rise steel structure is strong due to redevelopments in metropolitan areas, Osaka IR-related and semiconductor-related facilities in Kyusyu region, etc. Operational rate of the plants is high due to production for large projects coming into full swing. It is even more crucial to manage costs and schedule properly in the background of high prices and the workstyle reform.

FY202503 Forecast (2) Civil Engineering Segment

Outstanding market shift is underway from new-construction to renewal and maintenance. In FY202403 order placement decreased in renewal market for the moment, but the market is still substantial potentially. Competitive environment becomes even tougher with some indications of industry restructuring. New-construction and Maintenance business covered the decreased order in Renewal business. Received many MLIT(*2) orders especially in New-construction business.

* MLIT: Ministry of Land, Infrastructure, Transportation and Tourism

FY202503 Forecast (3) Architecture Segment

Demands for distribution warehouses are still high in the context of the 2024 overtime regulation issue, etc. Besides our patented pre-manufactured low-rise metal buildings, we have and will pursue large multi-floored projects proactively. Profit in FY202403 rose compared to the previous FY, but uncertain factors such as high construction costs suppress the forecast for FY202503.

FY202503 Forecast (4)Solution Segment

Software-Related : 3D-CAD software and information-sharing cloud service showed strong performance in the background of the construction DX movement. Furthermore, Consulting service starts growing.

Robot-Related : Market is potentially considerable. It has been expanding as production facilities returning to Japan and labor force declining. Development competition of humanoid robot intensifies worldwide. The number of units sold did not reach the target but increased YoY. Intend to increase sales with new sales agencies.

Setting the Lower limit for Yearly Dividend and Dividend Forecast

For the term of the 3rd Plan(FY202403-FY202603), we aim for “Payout Ratio of target 30% and dividend totaling to 4,600million yen” with stable dividends and agile share repurchases. In the fist FY we paid out about 2,250 million yen as dividend, repurchased for roughly 1,000 million yen. We aim for increasing the total amount by piling up profits. In addition, we changed the dividend policy and set the lower limit of 90 yen on yearly dividend per share for the remaining period of the 3rd Plan.
